

# DeskDox Enterprise Technical Brochure

Technical evaluation overview for regulated organizations deploying DeskDox EDMS.

DeskDox EDMS by Zbix Technologies

- Document control covers intake, metadata, previews, audit trails, lifecycle, and retention context.
- Workflow automation supports template routing, business calendars, notifications, and SLA operations.
- Access control aligns users, departments, folders, documents, and administrative permissions.
- Search combines OCR-backed full-text lookup with filters and saved search workflows.
- Emii can be configured with governed AI access patterns and local deployment options.
- Deployment planning can cover single-server, distributed Docker, private cloud, and air-gapped models.
